## *GENERAL OBSERVATION*

*To sum up, from the above report it is my concerned that this month's journal the number of Marks published has increased to some extent (63 Marks) compared to last month's Marks that were published (40 Marks) in the respective journal of the said month. Furthermore, another thing that has been observed in this month's journal is that most marks which have been published come from the ASIAN countries compared to other Countries in EUROPE which comes second after them then followed by AFRICA which this time around has only 2-mark*

*publications. On the other hand, it has also been observed that the number of trademarks published in this journal is still high compared to service marks.*
